

# CUSTOM LAB PANELS

## ColoFIT Home Collection Test \$40

The LabCorp ColoFIT™ Home Collection Test is a trusted at home test recommended once a year for individuals age 45 and up at average risk for colon cancer. This screening test can detect the presence of hidden blood in the stool, giving you the answers you need to plan for a healthier future.

## Men's Health Test \$199

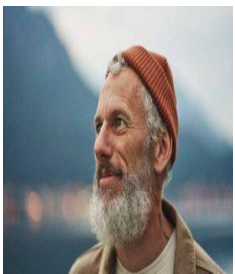

This blood test for men offers a comprehensive look at your wellness. Lipid Panel, HbA1c, CBC, CMP, PSA, Vit D and TSH

## Comprehensive Testosterone Test \$119

Testosterone is responsible for many essential male functions and characteristics—from your sex drive to your muscle mass. Some men experience symptoms when their free testosterone is low—even if their total testosterone is normal—which is why measuring both free and total testosterone can give you more answers.

**Total Testosterone, Free Testosterone, CBC, CMP and PSA**

## PSA Prostate Cancer Screening Test \$30

More than 10% of men in the U.S. develop prostate cancer in their lifetime. Our PSA (prostate-specific antigen) Prostate Cancer Screening Test measures the level of prostate-specific antigen in your blood  
**PSA**

## C-Reactive Protein – Cardiac \$22

CRP levels can indicate inflammation in the body, which may be associated with various health conditions, including cardiovascular disease.  
**CRP**

## Comprehensive Health Test \$93

These tests provide a more complete wellness screening by measuring key areas including cholesterol, triglycerides, average blood glucose (HbA1c) levels and other factors that may contribute to heart disease, diabetes and stroke.

**Lipid Panel, HbA1c, CBC, CMP, TSH and Vit B12**
